SECTION IX
OPTIONAL EQUIPMENT

9–1. GENERAL INFORMATION

This section provides general supplemental information on optional equipment for the MD 530F Plus Helicopter. The information includes a listing of usable optional equipment.

Supplemental data is prepared and included in this section whenever the installation of that equipment affects the FAA Approval Data for Limitations (Section II), Emergency and Malfunction Procedures (Section III), Normal Procedures (Section IV), and Performance Data (Section V).

The Flight Manual Supplemental Data is to be used in conjunction with the basic Flight Manual data and takes precedence over that data when the equipment is installed.

CAUTION **Be sure to include a review of the appropriate flight manual supplemental data for type of optional equipment installed (including STC items) as a regular part of preflight planning.**

9–2. LISTING – OPTIONAL EQUIPMENT

Table 9–1 lists MDHI optional equipment items available that require additional operating instructions. This table does not include non–MDHI STC items that may be FAA approved for use. Other optional equipment items may be found in the HMI.

SPECIAL NOTE:

Items in the table marked with an asterisk (*) are optional equipment items that have had their supplemental data incorporated into the main body of the flight manual and are identified by the statement, “If installed”.
